JOURNAL OF RESEARCH IN SCIENCE TEACHING

CONTENTS

Volume 23, 1986

Issue 1, January

- The Effect of Imagery Generation in Science Rule Learning: *William J. McIntosh* 1
- The Effects of an Explicit Problem-Solving Approach on Mathematical Chemistry Achievement: *Diane M. Bunce and Henry Heikkinen* 11
- The Student Opinion Survey in Chemistry: Some Cross-National Data: *R. A. Schibeci* 21
- Effect of Instruction Using Microcomputer Simulations and Conceptual Change Strategies on Science Learning: *Aletta I. Zietsman and Peter W. Hewson* .. 27
- A Comparison of Cognitive Skills between Completes and Dropouts in a College Physics Course: *H. T. Hudson* 41
- Exploring Relationships among Four Science Teaching–Learning Affective Attributes of Sixth Grade Students: *Harold Harty, K. V. Samuel, and Dwight Beall* 51
- Studies on Information Processing Rates in Science Learning and Related Cognitive Variables. I: Some Theoretical Issues Related to Motivation: *O. Roger Anderson* 61
- Studies of Information Processing Rates in Science Learning and Related Cognitive Variables. II: A First Approximation to Estimating a Relationship between Science Reasoning Skills and Information Acquisition: *O. Roger Anderson and J. Callaway* 67
- Two Schemes of Intellectual Development: A Comparison of Development as Defined by William Perry and Jean Piaget: *Bruce Perry, Michael P. Donovan, Linda J. Kelsey, John Peterson, Walter Statkiewicz, and Robert D. Allen* ... 73

Issue 2, February

- Training Science Teachers to Utilize Better Teaching Strategies: A Research Synthesis: *Russell H. Yeany and Michael J. Padilla* 85
- An Analysis of Factors that Affect Public and Private School Science Achievement: *John R. Staver and Herbert J. Walberg* 97
- Generalizability of Diagnostic-Prescriptive Teaching Strategies across Student Locus of Control and Multiple Instructional Units: *Jean S. Benson and Russell H. Yeany* 113

- The Sequence of Learning Cycle Activities in High School Chemistry: *Michael R. Abraham and John W. Renner* 121
- Research Interests of Secondary Science Teachers: *Dorothy L. Gabel, K. V. Samuel, Stanley Helgeson, Joseph Novak, and John Butzow* 145
- High School Students' Ability to Solve Molarity Problems and Their Analog Counterparts: *Dorothy L. Gabel and K. V. Samuel* 165

Issue 3, March

- Influence of Students' Background and Perceptions on Science Attitudes and Achievement: *R. A. Schibeci and J. P. Riley II* 177
- A Comparison of the Actual and Preferred Classroom Learning Environment in Biology and Chemistry as Perceived by High School Students: *Avi Hofstein and Reuven Lazarowitz* 189
- Trends in Teachers' Recommendations for Changing Elementary and Junior-High School Science Programs: *David R. Stronck* 201
- Searching for Excellence: *Robert E. Yager* 209
- The Effect of Simulation Games and Worksheets on Learning of Varying Ability Groups in a High School Biology Classroom: *Charles C. Spraggins and Robert E. Rowsey* 219
- The Effect of a New Prelaboratory Procedure on Students' Achievement in Chemistry: *F. Steven Isom and Robert E. Rowsey* 231
- High-School Biology, Chemistry, or Physics Learned Well in Three Weeks: *Julian C. Stanley and Barbara S. K. Stanley* 237
- High School Science Enrollment of Black Students: *Ellen O. Goggins and Joy S. Lindbeck* 251

Issue 4, April

- Human and Machine Diagnosis of Scientific Problem-Solving Abilities: *Ron Good, Robert Kromhout, and Wyllis Bandler* 263

Contributed Articles

- Analyzing Hierarchical Relationships among Modes of Cognitive Reasoning and Integrated Science Process Skills: *Russell H. Yeany, Kueh Chin Yap, and Michael J. Padilla* 277

- On Narrative Method, Personal Philosophy, and Narrative Unities in the Story of Teaching: *F. Michael Connelly and D. Jean Clandinin* 293
- The Influence of Field Experiences on Stages of Concern and Attitudes of Preservice Teachers toward Science and Science Teaching: *Barbara M. Strawitz and Mark R. Malone* 311
- Performance of Students in Grades Six, Nine, and Twelve on Five Logical, Spatial, and Formal Tasks: *Michael J. Wavering, Bruce Perry, Linda J. Kelsey, and Donald Birdd* 321
- The Effects of Teachers' Wait-Time and Knowledge Comprehension Questioning on Science Achievement: *Joseph P. Riley II* 335
- Perceived Science Ability as a Factor in the Course Selections of Men and Women in College: *George E. DeBoer* 343
- Meaning from Curriculum Analysis: *Menahem Finegold and Dorothy MacKeracher* 353
- The Role of Physical Content in Piagetian Spatial Tasks: Sex Differences in Spatial Knowledge?: *Susan L. Golbeck* 365

Issue 5, May

- Some Effects of the ISCS Program: A Meta Analysis: *M. Nadir Atash and George O. Dawson* 377
- Using Short Forms of Classroom Climate Instruments to Assess and Improve Classroom Psychosocial Environment: *Barry J. Fraser and Darrell L. Fisher* 387
- Plants or Animals—Which Do Junior High School Students Prefer to Study?: *James H. Wandersee* 415
- Making Programming Instruction Cognitively Demanding: An Intervention Study: *John Dalbey, Francoise Tourniaire, and Marcia C. Linn* 427
- Persuading Teachers to Reexamine the Innovative Elementary Science Programs of Yesterday: The Effect of Anecdotal versus Data-Summary Communications: *Thomas R. Koballa, Jr.* 437
- Children's Strategies for Discovering Cause–Effect Relationships: *Alan N. Rudnitsky and Charles R. Hunt* 451

Comment & Response

- Improving Research on Computers in Science Learning: *Joseph S. Kracjik, Patricia E. Simmons, and Vincent N. Lunetta* 465
- Improving Research on Computers in Science Learning: A Reaction: *Michael E. Hale* 471

Issue 6, September

- Is the Disappointment in the Implementation of a New Science Curricula Justified?: A Study Quantifying Descriptive Data: *Naama Sabar* 475
- Teaching Hands-On Science Activities: Variables that Moderate Attitude-Behavior Consistency: *Thomas R. Koballa, Jr.* 493
- A Neurological Model of Sensory-Motor Problem Solving with Possible Implications for Higher-Order Cognition and Instruction: *Anton E. Lawson* 503
- Student Gain in Reasoning Ability as a Function of Teacher Reasoning Level and Teaching Style Preference: *Frances Lawrenz and Anton E. Lawson* 523
- The Effects of Problem Format, Number of Independent Variables, and Their Interaction on Student Performance on a Control of Variables Reasoning Problem: *John R. Staver* 533
- A Factor Analytic Study of Secondary Science Teacher Competencies within which Growth is Perceived as Important by Science Teachers, Supervisors, and Teacher Educators: *Bruce R. Tulloch* 543
- Learning Environmental Science from Text Aided by a Diagnostic and Prescriptive Instructional Strategy: *Pierce Farragher and Michael Szabo* 557

Issue 7, October

- The Construction and Validation of the Test of Graphing in Science (TOGS): *Danny L. McKenzie and Michael J. Padilla* 571
- Can the History of Science Help Science Educators Anticipate Students' Misconceptions?: *James H. Wandersee* 581
- Science and Technology Related Global Problems: In International Survey of Science Educators: *Rodger W. Bybee and Teri Mau* 599
- The Occurrence of Assimilation and Accommodation in Learning High School Physics: *John W. Renner, Michael R. Abraham, and Howard H. Birnie* ... 619
- Evaluating Instruction: The Complementary Use of Clinical Interviews: *Fred N. Finley* 635
- A Technique for Evaluating Skills in High School Science: *Kevin F. Collis and H. A. Davey* 651
- Erratum 665

Issue 8, November

- Effect of Women Science Career Role Models on Early Adolescents' Attitudes toward Scientists and Women in Science: *Walter S. Smith and Thomas Owen Erb* 667
- Adolescent Reasoning in Socio-Scientific Issues, Part I: Social Cognition: *Reg Fleming* 677
- Adolescent Reasoning in Socio-Scientific Issues Part II: Nonsocial Cognition: *Reg Fleming* 689
- Predicting Elementary Science Learning Using National Assessment Data: *Wayne W. Welch, Herbert J. Walberg, and Barry J. Fraser* 699
- A Piagetian Analysis of Process Skill Test Items: *Philip S. Adey and Wynne Harlen* 707
- Cognitive Restructuring as an Early Stage in Problem Solving: *George M. Bodner and Theresa L. B. McMillen* 727
- Attainment of Skill in Using Science Processes II: Grade and Task Effects: *Carl F. Berger and Paul R. Pintrich* 739

Comments and Criticism

- The Relative Difficulty of Teaching Science in Elementary and Secondary School: A Response: *Linda Cronin, Elisabeth Charron, and Mariona Espinet* 749
- Author's Response: *Steven J. Rakow* 753
- Variables Misidentity and Unwarranted Conclusions: Two Dangers of Secondary Analyses: *Pinches Tamir* 755
- Author's Response: *Steven J. Rakow* 757

Issue 9, December

- Cognitive Strategies Used by Chemistry Students to Solve Volumetric Analysis Problems: *J. Anamuah-Mensah* 759
- A Study of the Latent Effects of Family Learning Courses in Science: *Eugene D. Gennaro, Nancy Hereid, and Karen Ostlund* 771
- Twenty Questions about Student Errors: *Kathleen M. Fisher and Joseph Isaac Lipson* 783

- Factors Influencing Teacher Decisions on School, Classroom, and Curriculum: *Robert K. Crocker and Helen Banfield* 805
- A Study of Field Independent Biased Mental Ability Tests in Community College Science Classes: *Linda W. Crow and Martha Kime Piper* 817
- A Systematic Procedure for Constructing a Valid Microcomputer Attitude Scale: *Samiha Abdel-Gaid, Cecil R. Trueblood, and Robert Shrigley* 823
- The Performance of College Students on Piaget-Type Tasks Dealing with Distance, Time, and Speed: *Ervin Poduska* 841

Comments and Criticism

- Comments on "A Research Methodology for Studying How People Think": *Michael Shayer* 849
- Authors' Response: *Jill H. Larkin and Barbara Rainard* 851
- Science Education in Elementary School: Some Observations: *Dewey Dykstra, Jr.* 853
- Testing the Model of Educational Productivity: *Peter F. W. Preece* 857
- Information for Contributors 859
- Author Index 861
